1 Billing method

Alibaba Cloud provides a wide range of SSL digital certificate services.

Certificate pricing is CA-specific. Factors that affect certificate pricing include root certificate brand, certificate type, number of domains, number of wildcard domains, and the service duration.

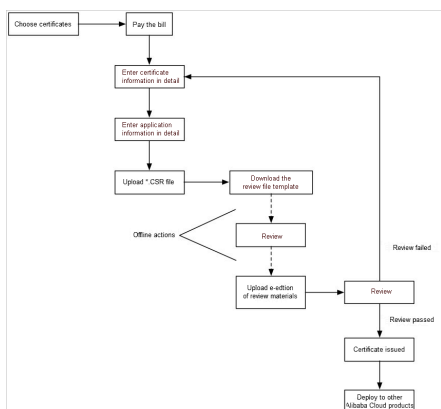

For more information about the certificate pricing, see [Detailed Pricing of Certificate Services](#).

2 Purchase guide

After SSL certificate is paid, you are required to submit an application and pass review before you can apply the certificate to cloud product. You may visit SSL certificate console to purchase and apply for SSL certificate.

Context

To purchase digital certificates with Alibaba Cloud Certificates Service, follow these steps:

Procedure

1. Log on to [Alibaba Cloud Certificates Service purchase page](#).

2. Select the Region, Category, Brand, Type of Domain, and the number of Domains to be added.

Alibaba Cloud Certificates Service

Basic Configuration

Region Asla Pacific SE 2 EU Central 1 Middle East 1

Category OV SSL

OV SSL offers encryption to implement strict identity verification for applicants. It certifies trusted identity.

Select Brand Entrust

Entrust Datacard provides the most stringent organization validation certificate

Type of Domain Wildcard Domain Single Domain Multiple Domain

Protection of one domain name with a wildcard (covering all the domain names at the same level as the "*" wildcard). When you apply for a certificate for a domain name such as *.example.com, the certificate issued will support a.example.com, a1.example.com, a2.example.com and so on, but does not support b.a.example.com, b1.a.example.com and so on

1	2	3	4	5	10
20	50	100			

1 Domain(Sans/Subdomain/FQDN/Wildcard)

Purchase Plan

Quantity

Duration Purchased 1 Year 2 Years

Expired after one year

For certificate brands and categories, please refer to [SSL certificate configuration table](#)

3. Select the Quantity of the certificates.
4. Select the Duration, that is, the validity of the certificate.
5. Click Buy Now and complete the payment.
6. In the [Alibaba Cloud Certificates Service console](#), complete the certificate order information.

- Enter the information of the domains to add.

Note:

The number and type of domains must be the same as those on the purchased certificate order.

- Enter your application information.
- Upload the certificate request file (CSR file).

7. Download the review file template.
8. Prepare the required review materials. and please refer to [Apply for and validate certificates](#)
9. Upload electronic copies of the review materials and submit the application.

3 New purchase upon expiration

The validity period of an Alibaba Cloud SSL certificate is one or two years, depending on the type of the certificate. Once your SSL certificate expires, you need to purchase a new one.

Payment

Post-payment is not accepted. You must pay first to activate the service.

To request a fee-based certificate, you must select the certificate type, the number of domain names, and the certificate brand. Then, you must pay for the certificate, enter the details for the certificate, and submit it for review. If your account balance is insufficient to cover the cost of the certificate, the follow-up operations will fail, and you will be unable to use Alibaba Cloud SSL Certificates Service.

New purchase upon expiration

SSL certificates cannot be renewed, and can only be purchased. Before your certificate expires, you need to log on to the Alibaba Cloud [SSL Certificates console](#) to purchase and apply for a new certificate.

Note:

Purchase the replacement certificate three to ten working days before certificate expiration so that the new certificate can be reviewed before the existing certificate expires.

Note:

You need to re-bind the domain name for the new certificate.

Procedure

1. Log on to the [Alibaba Cloud SSL Certificates console](#).
2. Click Purchase Certificate in the upper-right corner to go to the certificate purchase page.

3. Select the parameter values and complete payment.

Note:

If the brand and domain type of the new certificate are exactly the same as the previous certificate, the system automatically synchronizes the application information and review materials that were submitted previously. This will not shorten the duration of the review process.

4. Apply for an SSL certificate and re-bind the domain name.

5. Submit the material for review.

6. Install the newly purchased certificate on your server to replace the certificate that is about to expire.

Note:

If you do not install the new certificate on your server, the HTTPS will become unavailable once the previous certificate expires.

4 Refund

You can request a full refund of a digital certificate order before it is submitted for review, or if it fails the review. To get a refund, you must submit the ticket.

Note:

However, the digital certificates that are successfully issued are non-refundable, in any case.
