# 1 Quick BI billing methods

---

Quick BI charges fees according to the number of users in the account and the subscription duration. When you use Quick BI services to create or read reports, you need to occupy a certain number of users. You can purchase users based on your needs. To purchase Quick BI services, see [Purchase, upgrade, and renew Quick BI services](#).

Each purchased Quick BI service is active for a maximum of one year. You can select the number of users and the subscription duration based on your needs. When your Quick BI service is about to expire, the system sends a message to prompt you to renew your Quick BI service.

Your resources are retained for seven days from the expiration date. If you do not renew your Quick BI service within seven days after the service expires, your resources are automatically released, and all data except for files are permanently removed. For more information about product expiration, see [Overdue payments](#).

Quick BI provides two editions using different billing methods.

- Quick BI Pro
- Quick BI Professional Edition

## Quick BI Pro

The subscription period of the Pro edition is fixed to one year. You can specify the number of users to be purchased, and the system automatically calculates the prices for you.

## 2 Purchase, upgrade, and renew Quick BI services

Quick BI provides Pro and Professional Edition editions. For the pricing and billing method of each edition, see [Quick BI billing methods](#)

### Quick BI Pro

If you have purchased a Quick BI Pro edition, go to the Quick BI homepage and click Settings to check the organization and permission management functions.

Click the Settings icon to go to the organization settings page, as shown in the following figure.

On this page, you can create organizations, and add, edit, or delete members of an organization. For more information about organization management, see [Basic concepts about organization management](#).

In Workspace, you can operate row-level permissions and data objects including workbooks, dashboards, and portals.

### Quick BI Professional Edition

In addition to the features detailed in Quick BI Pro, Quick BI Professional Edition also supports cloud Hive databases, on-premises Hive databases, Vertica data sources, and IBM DB2 LUW data sources. Quick BI Professional Edition can recognize minutes and seconds in time data and the filtering of time data is accurate to within one second. With Quick BI Professional Edition, you can build data models using cross-database connections. MaxCompute, MySQL, and Oracle data sources are supported.

### First purchase

Before you purchase Quick BI services, you must confirm the number of users.

A user can be a RAM user account or an Alibaba Cloud account. Note that Alibaba Cloud RAM users do not have the permission to purchase Quick BI services. Use a primary account to purchase Quick BI services.

To purchase Quick BI services for both an Alibaba Cloud account and a RAM user, you must select 2 for the number of users.

To purchase Quick BI services for a RAM user, you can use an Alibaba Cloud account, and delete the Alibaba Cloud account after the RAM user is connected.

If this is the first time you use Quick BI, you can purchase Quick BI services for multiple users at a time.

#### Procedure

1. Go to the [Quick BI](#) purchase page.
2. Specify the number of users and the subscription duration.
3. After you have confirmed the price, click Buy Now.
4. Enter the username and the password, and click Log On to log on to the Alibaba Cloud homepage.

If you do not have an Alibaba Cloud account, click Join Free to register an account as prompted by the system.

5. After you have confirmed the order, click Pay.

#### Add an account

You can purchase Quick BI services for yourself or for others. If you purchase a Quick BI service for another person, you only need to add that person's account under your account.

If you have purchased a Quick BI service and you need to purchase a Quick BI service for another person, make sure that the account you used to purchase the service has been activated.

#### Procedure

1. Log on to the Quick BI console.
2. Click Upgrade Version.
3. Select the number of users for whom Quick BI services are to be purchased.
4. After you have confirmed the order, click Pay.

## Add a Quick BI user

After you have purchased enough users, you can add users within the quota.

### Note:

When you add a user, we recommend that you add RAM users. If you remove a user account, the Alibaba Cloud account may disclose company data. Add users with caution.

### Procedure

1. Log on to the Quick BI console.
2. Click Manage > Add Member .
3. Add an Alibaba Cloud account or a RAM user.
4. Click OK to add the user.

The added user will be automatically displayed in the user list.

## Remove a Quick BI user

If an added user stops using Quick BI services, you can remove this user from the user list. After removal, this user is unable to use any functions of Quick BI.

### Procedure

1. Log on to the Quick BI console.
2. Locate the user on the Members tab page.
3. Click Remove to remove the user.

## Upgrade Quick BI

You can upgrade Quick BI in the Quick BI console.

### Procedure

1. Log on to the Quick BI console.
2. Click Upgrade Version, and upgrade Quick BI as prompted by the system.

## Renewal

Renew the subscription for your Quick BI user within seven days after the account expires. Otherwise, the system automatically releases your resources.

For the releasing and retaining of resources, see [Overdue payments](#).

### Procedure

1. Log on to the Quick BI console.
2. Click Renewal and select a renewal period.
3. Click Pay to complete the renewal.

## 3 Overdue payments

---

### Quick BI expiration reminder

The system sends expiration reminder once a day for 3 days before the expiration date of a Quick BI instance, and send a reminder 6 days after the expiration. The instance and related resources is released after the payment is overdue for 7 days.

### Quick BI resources retention period

After the expiration of the product, the product resources are retained for 7 days. During this period, your data will not be lost.

During the expiration and grace period, you cannot buy a new Quick BI Product. You can purchase Quick BI again only after all previous data resources are released. After the renewal, the product can be used continually.

If you want to renew the product, see [Purchase, upgrade, and renew Quick BI services](#).

### Rules of resources release

If you do not renew Quick BI before its expiration date, your resources are retained for an additional seven days during which you can renew Quick BI.

On the sixth day after the initial expiration date, the system sends you one more prompt and, if you do not renew your Quick BI product within the seventh day after expiration, all data (except for files) are released and cannot be recovered. If you renew Quick BI after its expiration date, the start date of the new validity period is counted from the date of renewal.

If you renew Quick BI before its expiration date, the start date of the new validity period is counted from the expiration date of the last validity period.

If you want to add users, see [Purchase, upgrade, and renew Quick BI services](#).
