## Document conventions

Style	Description	Example
	A danger notice indicates a situation that will cause major system changes, faults, physical injuries, and other adverse results.	 <b>Danger:</b> Resetting will result in the loss of user configuration data.
	A warning notice indicates a situation that may cause major system changes, faults, physical injuries, and other adverse results.	 <b>Warning:</b> Restarting will cause business interruption. About 10 minutes are required to restart an instance.
	A caution notice indicates warning information, supplementary instructions, and other content that the user must understand.	 <b>Notice:</b> If the weight is set to 0, the server no longer receives new requests.
	A note indicates supplemental instructions, best practices, tips, and other content.	 <b>Note:</b> You can use Ctrl + A to select all files.
>	Closing angle brackets are used to indicate a multi-level menu cascade.	Click Settings > Network > Set network type.
<b>Bold</b>	Bold formatting is used for buttons, menus, page names, and other UI elements.	Click OK.
Courier font	Courier font is used for commands.	Run the <code>cd /d C:/window</code> command to enter the Windows system folder.
<i>Italic</i>	Italic formatting is used for parameters and variables.	<code>bae log list --instanceid</code> <code>Instance_ID</code>
[ ] or [a b]	This format is used for an optional value, where only one item can be selected.	<code>ipconfig [-all -t]</code>

Style	Description	Example
<b><code>{}</code> or <code>{a b}</code></b>	<b>This format is used for a required value, where only one item can be selected.</b>	<code>switch {active stand}</code>

# 1 Console overview

After you log on to the [DataV console](#), you can edit visualization projects and manage your data sources.

Menu bar

You can manage projects and data sources by clicking the corresponding tabs on the top navigation bar. If you are a Developer Edition user, click Widgets to view all the widgets created by you.

My visualizations

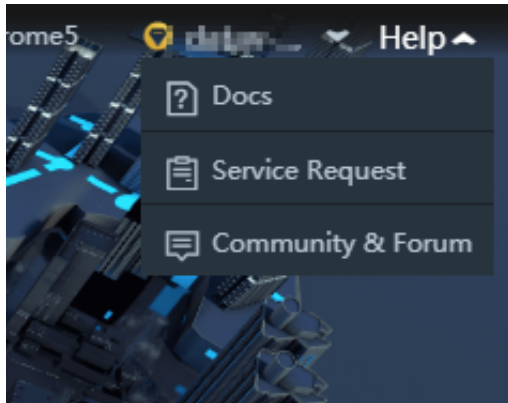

On the Projects page, you can:

- view all the visualization projects created by you, and the number of projects available. The total number of projects you can create varies with the editions. For more information about editions, see [What is DataV](#).
- [group your projects](#).
- [sort your projects](#).

- *search for projects by name.*

## Help

**The Help section provides you with more information about DataV. You can read DataV documents and open a ticket by clicking Docs and Service Request to learn more about DataV’ s features and usage techniques..**

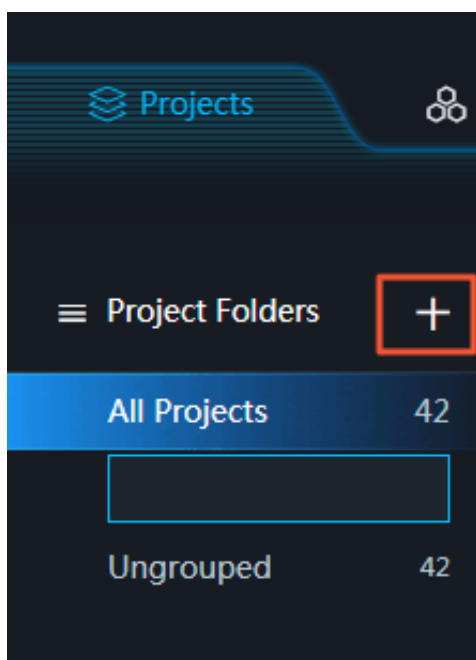

## 2 Project folders

The project grouping feature allows you to reorganize DataV projects for improved functionality.

### Procedure

1. Log on to the [DataV console](#), to go to the Projects pane.
2. Click + on the right side of Project Folders.

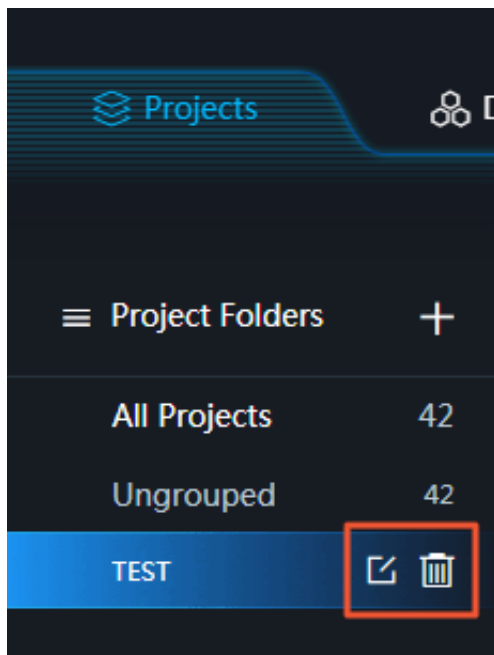

3. Enter a group name to create a new group.

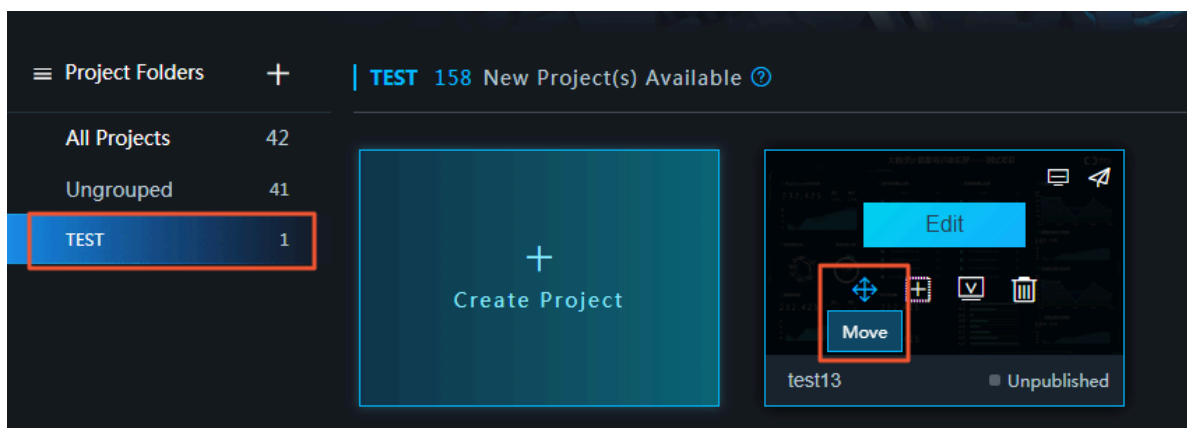

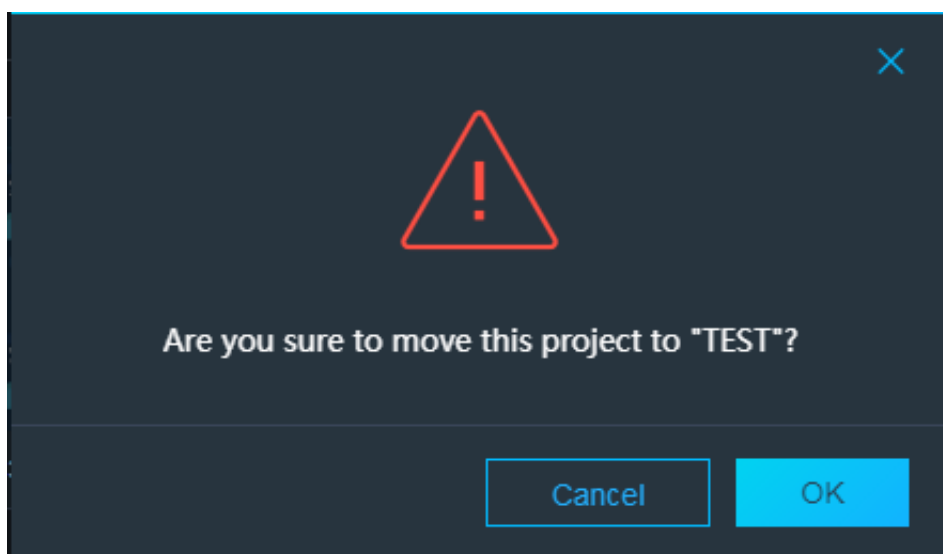

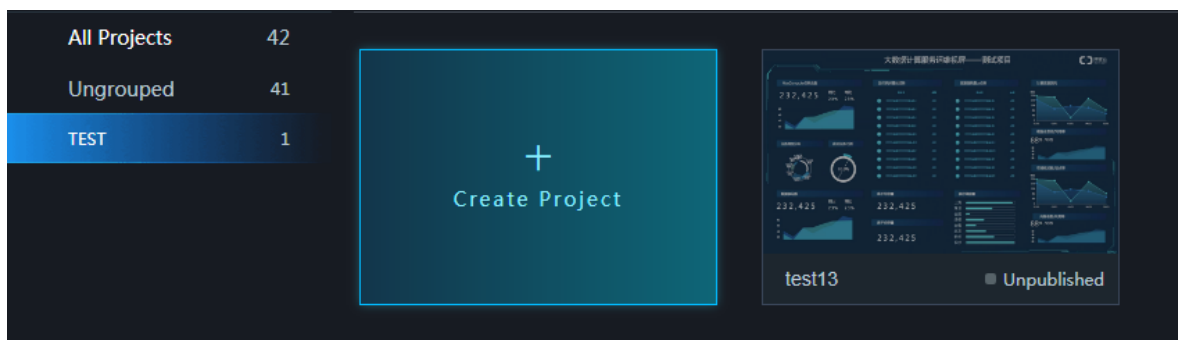

Note:

To delete a group, click the trash bin icon. Associated projects will then be ungrouped.

4. Move the pointer over the project you want to group, click the four arrows icon, and drag the project to the group that has been created on the left side of the page.

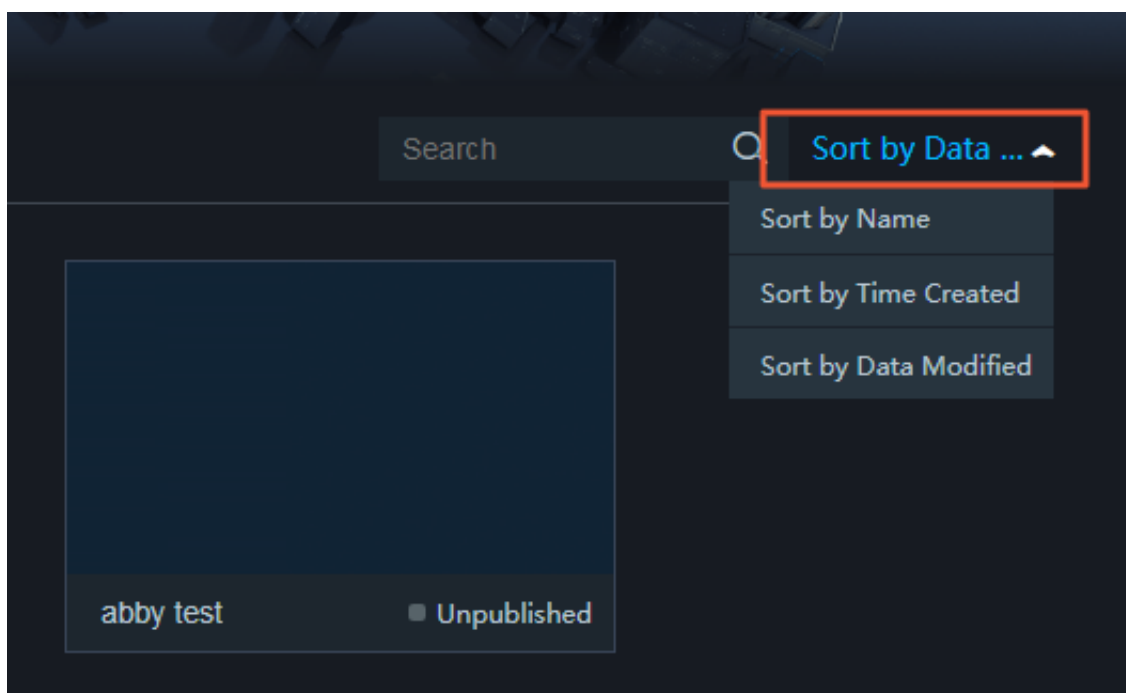

**5. Click OK.****6. Click the group to view the projects that it contains.**

## 3 Sort projects

DataV updates enable you to sort projects by Name, Time Created, and Time Modified.

### Procedure

1. Log on to the [DataV console](#) to go to the Projects panel.
2. Move the pointer over the Sort by Data Modified (by default) button on the far right of the page, and click a sort type.

### Note:

DataV provides three types of sorting methods Name, Time Created, and Data Modified.

## 4 Search for projects by name

The DataV provides a search box. You can search for a big screen project by entering its name.

### Procedure

1. Log on to the [DataV console](#) to go to the Projects pane.
2. In the search box on the right side of the page, enter the name of the project that you want to find.

The project with the corresponding name is matched, as shown in the following figure.
