## Regions

If you need to activate a region that is not on the product buy page, you can apply for this region by submitting a ticket. The following list provides the supported regions:

- China: China (Hangzhou), China (Shanghai), China (Shenzhen), China (Qingdao), China (Beijing), China (Zhangjiakou), and China (Hohhot), China (Hong Kong)
- Asia Pacific: Japan (Tokyo), Singapore, Malaysia (Kuala Lumpur), and Indonesia (Jakarta)
- Europe and America: UK (London), Germany (Frankfurt), US (Virginia), and US (Silicon Valley)
- Middle East and India: India (Mumbai)

## Unit

CNY

## Disk storage

Computing is decoupled from storage (instance hosts). The computing and storage resources can be separately expanded. This achieves high flexibility. Main pricing items of a database instance: the host nodes of instances and the cloud disks that are attached to the instance host nodes.

- Pricing of an instance host node

 **Note** For the production system, you must configure multiple nodes and multiple data replicas. The number of nodes must be greater than or equal to the number of data replicas so that the host nodes and data replicas are redundant. This way, a failover can be performed when a host node becomes faulty or a storage failure occurs. For more information about prices, see the product buy page.
