Document conventions

Style	Description	Example
	A danger notice indicates a situation that will cause major system changes, faults, physical injuries, and other adverse results.	 Danger: Resetting will result in the loss of user configuration data.
	A warning notice indicates a situation that may cause major system changes, faults, physical injuries, and other adverse results.	 Warning: Restarting will cause business interruption. About 10 minutes are required to restart an instance.
	A caution notice indicates warning information, supplementary instructions, and other content that the user must understand.	 Notice: If the weight is set to 0, the server no longer receives new requests.
	A note indicates supplemental instructions, best practices, tips, and other content.	 Note: You can use Ctrl + A to select all files.
>	Closing angle brackets are used to indicate a multi-level menu cascade.	Click Settings > Network > Set network type.
Bold	Bold formatting is used for buttons, menus, page names, and other UI elements.	Click OK.
Courier font	Courier font is used for commands.	Run the <code>cd /d C:/window</code> command to enter the Windows system folder.
Italic	Italic formatting is used for parameters and variables.	<code>bae log list --instanceid Instance_ID</code>
[] or [a b]	This format is used for an optional value, where only one item can be selected.	<code>ipconfig [-all -t]</code>

Style	Description	Example
{ } or {a b}	This format is used for a required value, where only one item can be selected.	switch {active stand}

1 Overview

The cost of an E-MapReduce product consists of the cost of ECS, the cost of the E-MapReduce , and the cost of the external network traffic of the Master node.

**Notice:**

If your cluster is large, submit a ticket to Alibaba Cloud to request a discount.

The overall cost of E-MapReduce consists of the following:

- Cost of ECS products

Alibaba Cloud Elastic Compute Service (ECS) comes included when you purchase an E-MapReduce cluster, meaning that you do not need to prepare ECS in advance. If you are entitled to a discount for ECS, this also applies to your purchase of E-MapReduce.

- Cost of E-MapReduce products

E-MapReduce provides multi-dimensional management services for clusters, including page display and control, API and SDK support, monitoring and alarms, O&M tools, and automatic back-end O&M. For detailed pricing information, please see [Price of Subscription](#), [Price of Pay-As-You-Go](#).

- Cost of the external network traffic of master nodes

In created clusters, 8 Mbps of public network bandwidth is available for master nodes (for an HA cluster, each of the two master nodes has 8 Mbps of bandwidth). Traffic is Pay-As-You-Go and is not included in the cost of the clusters. You are charged on an hourly basis for outbound traffic, but inbound traffic is free. For example, if in an hour you use 10 GB of outbound traffic on a public network, the charge is 10 x price per GB (in USD). Traffic fees may vary between regions. For more information, please see [ECS network prices](#).

3 Renewal

Only Subscription clusters need to be renewed. Pay-As-You-Go clusters are billed hourly.

To renew a cluster, see [Cluster renewal](#).

4 Expiration and overdue payments

Expiration

While Pay-As-You-Go clusters cannot expire, Subscription clusters can.

If an ECS instance in a cluster expires, you are notified of its expiration. Expired ECS instances run for another 15 days. After this point, if your subscription is not renewed, the expired ECS instances stop, but data is retained for an additional 15 days. If after 30 days your subscription is not renewed, the instances are released and the data permanently deleted.

When E-MapReduce services expire, you can no longer perform operations on the cluster from the console or call APIs. Automatic O&M (including monitoring and alarms) is also stopped.

If you want to continue using E-MapReduce and ECS instances, you must renew your subscription. E-MapReduce and ECS instances can be renewed at the same time on the E-MapReduce product console. After renewal, data and services are both automatically restored.

If you want to release a cluster, wait for it to stop. ECS instances are released automatically, without the need for renewal.

Overdue payments

**Notice:**

The system may send you notifications that you have overdue payments. When this occurs, please clear all overdue payments to avoid instances being released. Please note that your instances may be released at a system-selected time after the payment due date.

A payment is overdue when your balance is insufficient and you cannot pay for the expenses incurred in the last hour. It is not possible for a Subscription cluster to be overdue in its payment.

If one of your Pay-As-You-Go clusters has a payment overdue, E-MapReduce stops.

ECS instances in a cluster that has an overdue payment continue to run for 15 days, after which they stop. Data is retained for an additional 15 days. After this, if you do not make a payment, the instances are released and the data permanently deleted. E-MapReduce stops until the cluster is restored or released.

Others

Different clusters do not affect one another. For example, if you have a Subscription cluster and a Pay-As-You-Go cluster, the former is not impacted if the latter has a payment overdue.

5 Price of Subscription E-MapReduce, not including ECS (dollar/month per core)

This topic describes the price of Subscription E-MapReduce in different regions and corresponding machine type.

Notice:

"-" indicates that the region does not support the corresponding machine type, so there is no corresponding price.

6 Price of Pay-As-You-Go E-MapReduce, not including ECS (dollar/month per core)

This topic describes the price of Pay-As-You-Go E-MapReduce in different regions and corresponding machine type.

Notice:

"-" indicates that the region does not support the corresponding machine type, so there is no corresponding price.

Region: China
