[] or [a b]	This format is used for an optional value, where only one item can be selected.	<code>ipconfig [-all -t]</code>
{ } or {a b}	This format is used for a required value, where only one item can be selected.	<code>switch {active stand}</code>

# Table of Contents

1. Pay-as-you-go .....	05
------------------------	----

# 1. Pay-as-you-go

VPN gateways support the pay-as-you-go billing method.

 **Notice** The price information listed in this topic is for reference only. If the prices in these tables are different from those on the buy page, the prices on the buy page shall prevail.

## Billable items

VPN gateways provide the IPsec-VPN and SSL-VPN features. The following table describes the billable items for IPsec-VPN and SSL-VPN.

Feature	Billable item	Fee calculation
IPsec-VPN	<ul style="list-style-type: none"> <li>IPsec-VPN instance fee</li> <li>Data transfer fee</li> </ul>	VPN gateway fees = IPsec-VPN instance fee + Data transfer fee
SSL-VPN	<ul style="list-style-type: none"> <li>SSL-VPN instance fee</li> <li>Data transfer fee</li> <li>SSL specification fee</li> </ul>	VPN gateway fees = SSL-VPN instance fee + Data transfer fee + SSL specification fee
SSL-VPN + IPsec-VPN	<ul style="list-style-type: none"> <li>IPsec-VPN instance fee</li> <li>SSL-VPN instance fee</li> <li>Data transfer fee</li> <li>SSL specification fee</li> </ul>	VPN gateway fee = IPsec-VPN instance fee + SSL-VPN instance fee + Data transfer fee + SSL specification fee

- **Instance fee:**  
The VPN gateway instance fees include the IPsec-VPN instance fee, the SSL-VPN instance fee, or both, based on the features that you have enabled.
- **Data transfer fee:**  
The data transfer fee is charged based on the outbound data transfer per hour on the VPN gateway. Inbound data transfer is not charged. Outbound data transfer refers to the amount of data that is transferred from Alibaba Cloud to the Internet.
- **SSL specification fee:**  
After the SSL-VPN feature is enabled, you must select an SSL specification based on the maximum number of concurrent client connections. SSL specifications are charged at different unit prices.
- **Billing cycle:** 1 hour. If the usage duration is less than 1 hour, it is rounded up to 1 hour.
- **Bills** are generated on an hourly basis.

VPN gateways provide different bandwidth limits. When different bandwidth limits are selected, the IPsec-VPN and SSL-VPN instance fees are the same. The following table describes the prices of different bandwidth limits.

Region	10 Mbit/s (USD/hour)	100 Mbit/s (USD/hour)	200 Mbit/s (USD/hour)	500 Mbit/s (USD/hour)	1000 Mbit/s (USD/hour)
Mainland China	0.059	0.209	0.209	0.767	0.767

Region	10 Mbit/s (USD/hour)	100 Mbit/s (USD/hour)	200 Mbit/s (USD/hour)	500 Mbit/s (USD/hour)	1000 Mbit/s (USD/hour)

10	0.074
20	0.117
50	0.226
100	0.328
500	1.09
1000	1.547

The fees are calculated based on the following rules:

### Instance fee

### Data transfer fee

### SSL specification fee

### Overdue payments

- Your VPN gateway can continue to provide services within 15 days after the VPN gateway becomes overdue. To avoid service interruption, we recommend that you top up your account at the earliest opportunity.
- If you do not pay the outstanding amount within 15 days after the VPN gateway becomes overdue, the VPN gateway is suspended.  
If you top up your account after the VPN gateway stops providing services, the system automatically pays the outstanding amount. Then, the VPN gateway immediately starts to provide services.
- If you do not pay the outstanding amount within 15 days after the VPN gateway is suspended, the system automatically releases the VPN gateway.  
You are notified by text message and email one day before the system releases the VPN gateway. The configurations and related data are removed and cannot be recovered after the VPN gateway is released.
